## **SUBJECT AREA TIME ALLOTMENTS**

All schools will follow the subject area time allotments as prescribed by the Department of Education. Schools are still expected to adhere to Regulation 101/95 which stipulates the minimum requirements of the instructional day. Schools may choose to integrate subject area learning, where appropriate, in order to maximize student achievement. In addition, the following procedures must be adhered to:

### **A. EARLY AND MIDDLE YEARS SCHOOLS**

1. Opening and Closing exercises are not to be included in the 1800 minutes of instruction time per cycle in Early Years schools.
2. Each student must be scheduled a minimum of 1980 minutes per cycle in the Middle Years schools.
3. Basic French is compulsory in Grades 1 - 6. In order to qualify for the provincial categorical French Language grant, schools must follow the provincial recommendations for Basic French under the Optional category.

### **B. SENIOR YEARS COURSE GUIDELINES**

The Manitoba Senior Years program is based on the credit system with one credit equal to 110 hours of instruction (minimum). The Subject Area Time Allotments for Grades 9 – 12 are governed by the required credits for graduation in each instructional program.

The St. James-Assiniboia School Division senior years subject area time allotments must follow provincial requirements with the following additions:

1. That English 10F consist of a total of 220 credit hours (or equivalent) for one credit in total.
2. That the time allocation for Mathematics 40SP be 9 periods per cycle. That the time allocation for International Baccalaureate and Advanced Placement Programs be 6 periods.
