STUDENT HEALTH SERVICES

The St. James-Assiniboia School Division acknowledges that certain students may require medical procedures to be performed during the time the child is in school. The Division will conduct health procedures based on JHC-R Student Health Services. Regulation JHC-R has been developed based on the Unified Referral and Intake System (URIS) Policy Manual developed by Manitoba Family Services.

The Division will utilize a variety of Health Care Resources to develop an Individual Health Care Plan (JHC-E-1) for each student, as required, and to provide the necessary training and supervision. e.g. Victorian Order of Nurses, Olsten's Kimberly Quality Care, the Manitoba Lung Association, Public Health Nurses. The choice of service may depend on the provider already in place with the child.
