EEAA-R

**BUS SCHEDULING AND ROUTING**

The Transportation Supervisor will design bus routes with student safety in mind taking into account hazardous conditions, student access to pickup and drop off points in all types of weather, vehicle volumes and control at intersections, et cetera. All bus drivers (both Division and contract) will be given a set of safety criteria for routes and bus stops and will be instructed to provide immediate feedback to the Supervisor, Transportation when appropriate conditions are not met so adjustments can be implemented as quickly as possible.

Every bus driver shall operate their vehicle over such route or routes, on the days, and on such time schedule as may be directed by the Supervisor, Transportation in order to conform to the school days and hours.

Children will be dropped off on the side of the street where they live only where this can be achieved in an efficient manner in accordance with established routes and normal sweeps of buses through each area serviced.
