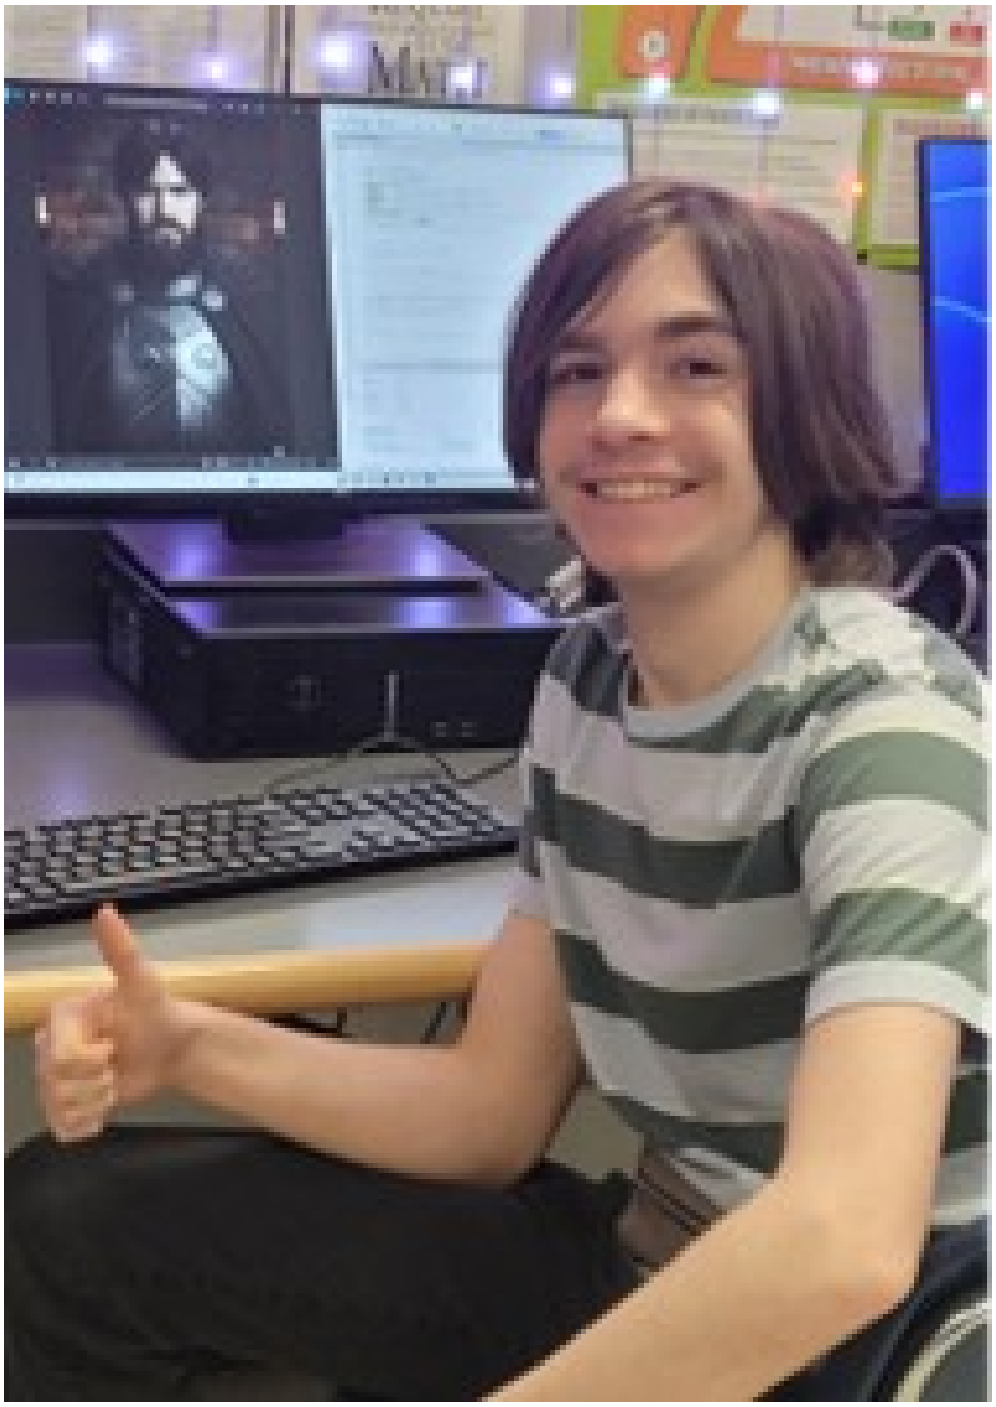
HUSKY STUDENT OF THE MONTH

Computer Science

Xavier


Xavier is taking my advanced level Computer Science 40S course after completing Computer Science 30S and 20S with one of the highest marks in those classes. Xavier has a fun personality with a strong work ethic and drive towards his studies that makes teaching him a joy. Xavier does high quality work and is an independent learner showing skills well above his age. Xavier shows a great attitude and aptitude for Computer Science. I hope Xavier will continue to excel and continue to find Computer Science a subject that he can pursue into the future. Great job Xavier!
