

# HUSKY STUDENT OF THE MONTH

## **Welding**

### Malcolm

Malcolm has been locking in for the last half of this semester. Malcolm took on a project that hasn't been done in class before and knocked it out of the park with precision fitting and welding. This prototype will be available for all students to base their work off of for years to come. Not to mention the steady improvement with SMAW and top tier work in his welding symbols. Great job Malcolm!
