

HUSKY STUDENT OF THE MONTH

Computer Science

Griffin

This grade 10 student is taking my grade 11 intermediate level Computer Science course after completing Computer Science 20S last year with one of the highest marks in the class. Griffin worked extremely hard on his final project last year and was very proud of the results. Griffin is working well in the course, asks questions, is receptive to feedback, and has adapted to any technical challenges that have come up (often not his fault). I hope Griffin will continue to excel and find Computer Science a subject that he can pursue into his future. Great job Griffin!
