HUSKY STUDENT OF THE MONTH

Artificial Intelligence 40S

Eden

This grade 11 student is taking the first ever Artificial Intelligence 40S (AI40S) course. Eden is working very well in the course and shows a great aptitude for picking up concepts in A.I. Eden does high-quality work and is an independent learner showing skills well above his age. Eden has a quiet but warm personality with a strong work ethic and drive towards studying that makes teaching this student a joy. I hope Eden will continue to excel and find useful skills in the class that he can pursue in the future. Great job Eden!
