In a French Milieu setting, all students in the school are studying in the French Immersion Program and all school activities are conducted in the French language.

Language:

The goal of the French Immersion Program is to provide students with the tools they need to be proud, engaged, plurilingual, global citizens. Students at the Kindergarten level are totally immersed in the French language and the language of instruction is French.

At the Early Years level, teachers use a variety of strategies to teach the language such as songs, poems, rhymes, actions, gestures and games. This gives students an opportunity to use their second language skills to develop their fluency and a more diversified vocabulary. Classrooms have many posters and vocabulary word walls to help students with their oral and written skills in French. Many French books are also used as classroom resources.

Culture:

An integral part of the curriculum is to develop a positive attitude towards the French culture. The students easily compare their new found language with their own culture. Early Years schools host an array of activities such as Festival du Voyageur Week, musical performances by French artists, etc. to expose students to the French language and to further develop an awareness of the French culture.
